**Title :** Thermal treatment of soil as a measure against invasive alien species and plant pests  
**Scope :** This document provides guidelines for thermal treatment of soil and soil-like materials to prevent the spread of invasive alien species and plant pests. It serves as a complement NS 3420 in situations where excavated soil need treatment for reuse, either at the location in question or at another location. The document outlines specific methods and requirements for the treatment process to effectively reduce the presence of viable biological agents. Additionally, it establishes conditions to ensure that the treated soil remains suitable for plant growth and that the treatment process does not adversely affect the surrounding environment. The document does not cover in situ treatment directly on the ground with intact (not excavated) material.

**National Ref :** ÖNORM ISO 104  
**Title :** Rolling bearings — Thrust bearings — Boundary dimensions, general plan (ISO 104:2015)

**Scope :** This International Standard specifies preferred boundary dimensions for single-direction and double-direction thrust bearings with flat back faces. In addition, it gives the minimum bore diameters of housing washers and maximum outside diameters of shaft washers of bearings in dimension series 11, 12, 13, 14, 22, 23 and 24. Guidelines for the extension of this International Standard for single-direction thrust bearings are given in Annex A.  
NOTE Boundary dimensions for aligning thrust bearings (none flat back faces) and aligning seat washers are given in ISO 20516.

 ICS :  
 National Ref : PNE 171330  
 Title : Review of Indoor Environmental Quality  
 Scope : The purpose of this document is to describe a methodology for carrying out an Indoor Environmental Quality Control Plan.  
 The field of application of this document are the indoor environments of all types of enclosures, facilities and buildings, except those that are intended "exclusively" to the activity developed in industrial and / or agricultural processes. This document is designed to ensure the well-being and health of the users of facilities, and does not interfere with compliance with regulatory requirements for the prevention of occupational hazards. This document is also applicable to common areas of hospitals (hospitalization, consultation rooms, outpatient areas, etc.) but not to controlled environment rooms (operating rooms, intensive care units, isolation rooms, etc.) which require more demanding air quality levels. Indoor environmental quality control in controlled environment rooms in hospitals and healthcare centres falls within the scope of application of the UNE 171340 standard. Indoor environmental quality control in hotel establishments falls within the scope of application of the UNE 171350 Standard.

<b>Title :</b>	Cables accessories. Joints and terminations for use on underground distribution cables of rated voltage up to 18/30 (36 kV)		
<b>Scope :</b>	The purpose of this standard is to define the characteristics that shall be met and the tests that shall be passed by the accessories for the underground distribution network of electric energy transmission and distribution companies, with high voltage cables up to 18/30 (36 kV) according to the UNE HD 620.		

The accessories included in the scope of this standard are the following:

- unipolar joints;
- unipolar interior and exterior terminations.

Mixed unipolar or three-polar joints between cables with dry insulation and cables with impregnated paper insulation are outside the scope of this standard.

<b>Title :</b>	Cable accessories. Separable connectors (plug-in and bolted types) for use on underground distribution cables of rated voltage up to 18/30 (36) kV		
<b>Scope :</b>	The purpose of this standard is to define the characteristics that shall be met and the tests that shall be passed by screened separable connectors for the underground distribution network with high voltage cables up to 18/30 (36) kV according to the UNE-HD 620.		

The accessories included in the scope of this standard are the following:

- Separable shielded plug-in connectors capable of connecting with external cone bushings specified in Standards UNE-EN 50180 and UNE-EN 50181.
- Separable shielded screwable connectors capable of connecting with external cone bushings specified in Standards UNE-EN 50180 and UNE-EN 50181.
- Separable connector accessories.

The separable connectors referred to in this standard are maneuverable without load or tension.

NOTE The figures in this standard do not imply design since they are only included as a
