This standard is to be applied jointly with these standards. To cover the load situation in Austria, various types of asphalt mixtures are defined in terms of mixture composition and requirements for aggregates and/or binder/binder systems through product types. This ÖNORM implements the requirements of ÖNORM EN 13108-1. Performance-related requirements (also referred to as "performance-related" or "performance testing") are defined for hot mixtures containing reclaimed asphalt according to EN 13108-8 and/or new binder systems. This allows for a high rate of reuse of reclaimed asphalt and/or new binder systems with technical equivalence and comparable durability and safety of the infrastructure.
